

FOLIO: Redefining the Library Services Platform (LSP) from the inside out

FOLIO

The Future of Libraries is Open

Neil Block

Vice President, Global Open Source Innovation

nblock@ebSCO.com

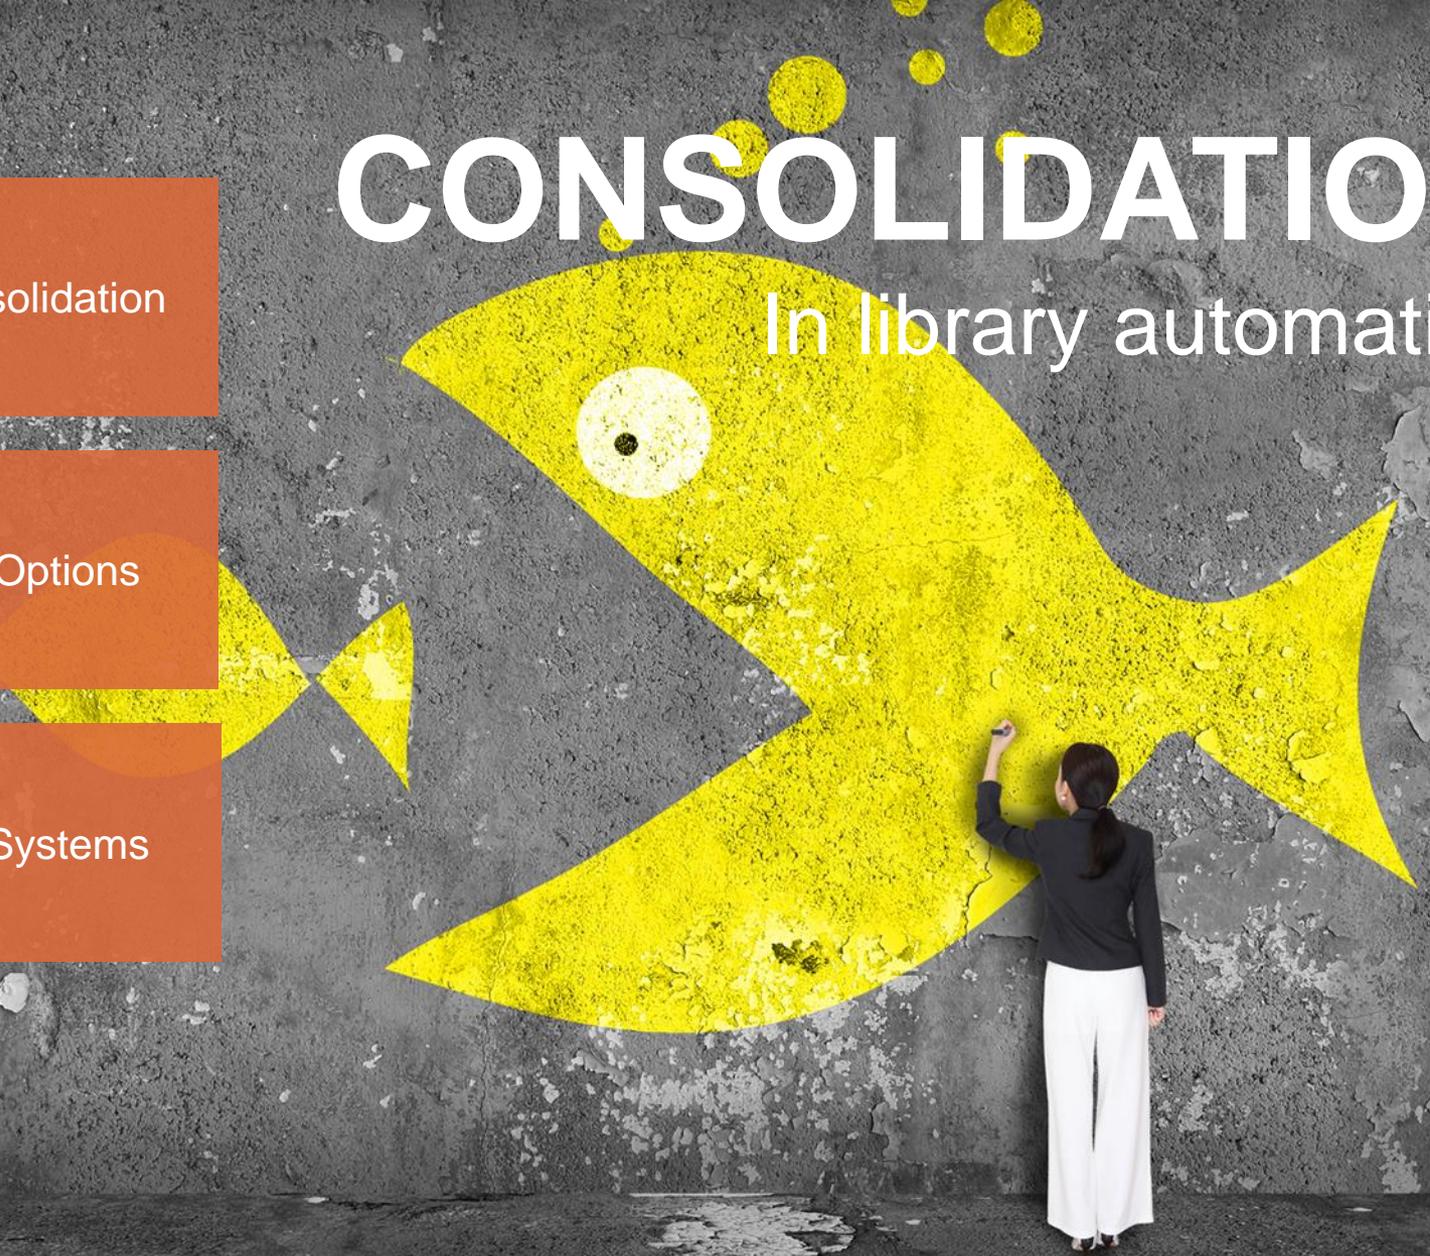

CONSOLIDATION

In library automation

Vendor Consolidation

Fewer ILS Options

Monolithic Systems

Monolithic System: a solution in which functionally distinct modules are interwoven (**or packaged together for marketing purposes**), rather than opened up via APIs to marketplace competition.

FOLIO

The Future of Libraries is Open

Higher Price!

Closed Systems

Fewer Suppliers

Less Choice

Current LSP Market

Open Systems

Many Suppliers

Risk Mitigation

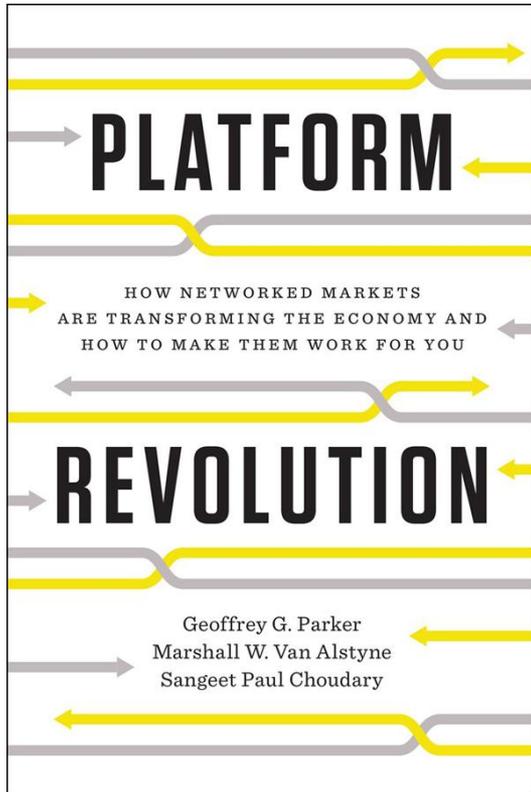

Lower Price!

Preferred LSP Market

Isn't it time for Library Services Platforms to deliver on their promise of open systems and interoperability?

“Library Services Platform”...enable the library to perform its services, internally and externally through their built-in functionality, as well as exposing a platform of Web services and other APIs for interoperability and custom development.

Marshall Breeding: Library Services Platforms, a Maturing Genre of Products. Library Technology Reports. May/June 2015, vol. 51/no 4

“a vibrant and healthy platform is dependent on the **value created by partners who are outside the platform itself**. If a platform is too closed , then partners cannot or will not contribute”

Will Platform Businesses Eat Library Systems?

Amigos Online Conference
Reimagining the ILS. 15/09/2016

Kenchadconsulting helping create more effective libraries.....

The world has evolved.

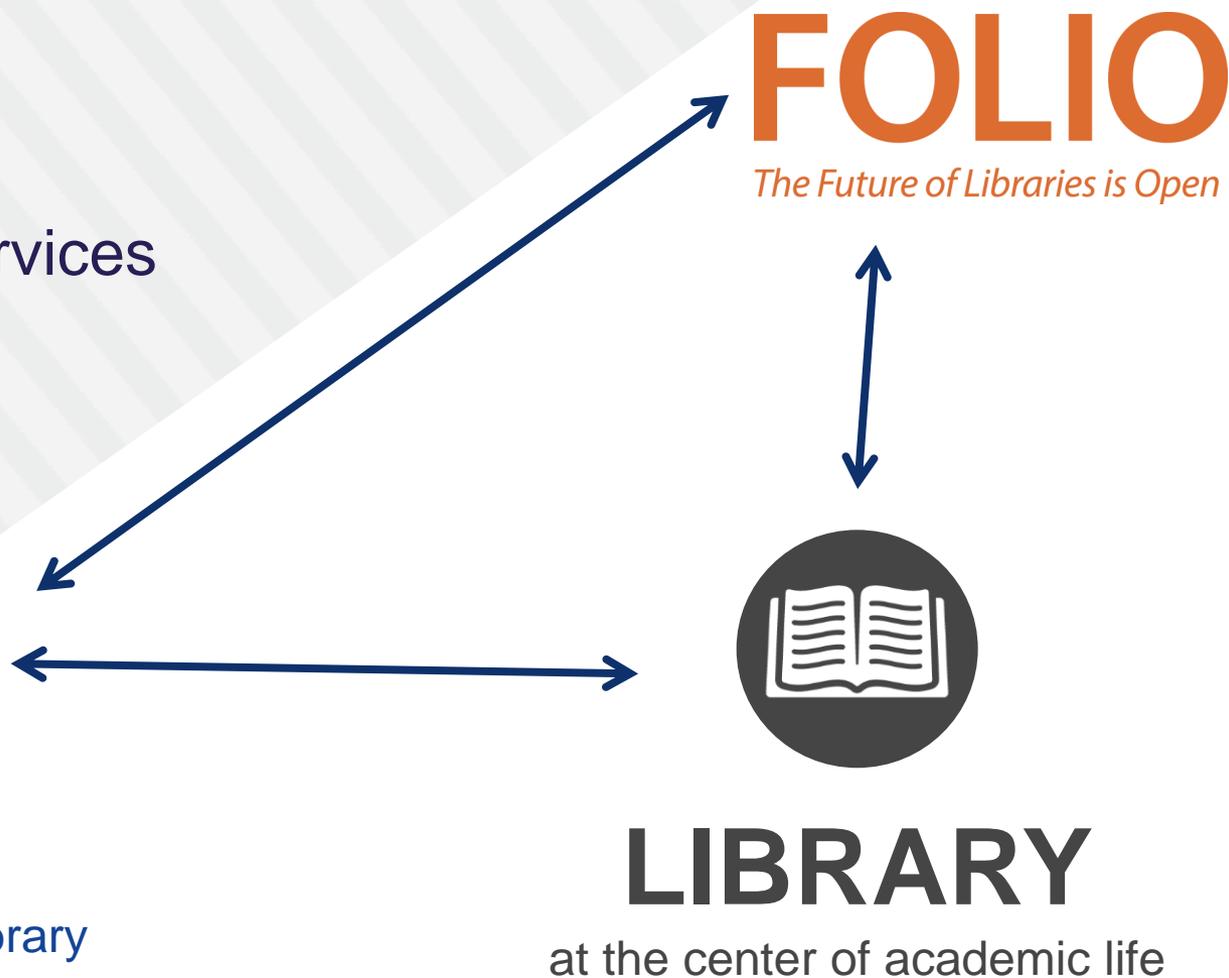

<https://developer.amazon.com/public/community/post>

The promise of 'platform' in the Library Services Platform has not yet been delivered.

Open Platforms Support:

- Improved Interoperability
- Open systems
- Open markets
- Machine Learning
- Improved User Services

The world has evolved.

How can the LSP adapt to
the new world of modern,
open platforms?

Open Source

Community

Modern

Modular

Supported

Introducing

FOLIO

a new open source Library Services Platform collaboration
supported by EBSCO

FOLIO GOALS

1

To **create a community** where libraries can come together to innovate

2

To **leverage open source** to reduce costs that libraries spend for library systems and support

3

To **improve products** by increasing library involvement in development

4

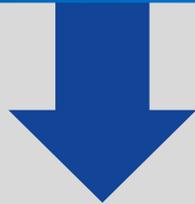

To bring **more choice** to libraries based on their particular needs

FOLIO

“future of libraries is open”

OPEN LIBRARY FOUNDATION

administrative home, community, funding

FOLIO

platform, product, marketplace

COMMUNITY

design, code sharing, workflows

FOLIO

is a dynamic global community of libraries, vendors, consortia and individual contributors building an open source platform for rethinking ILS workflows and services

FOLIO

“future of libraries is open”

OPEN LIBRARY FOUNDATION

governance, community, not-for-profit

FOLIO

platform, product, marketplace

COMMUNITY

design, code sharing, workflows

Open Library Foundation (OLF) is a not-for-profit organization providing infrastructure and governance to the FOLIO community.

1. GROW the community

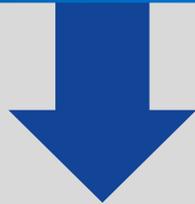

FOLIO

“future of libraries is open”

OPEN LIBRARY FOUNDATION

governance, community, funding

FOLIO

platform, product, marketplace

COMMUNITY

design, code sharing, workflows

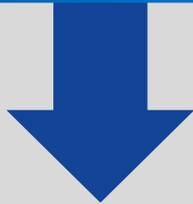

- FOLIO platform and base ILS apps are developed by Index Data (with EBSCO funding and FOLIO community guidance)
- New apps and extensions to existing apps are built by libraries, vendors and developers
- An open marketplace allows libraries to select apps to customize and extend the FOLIO system
- Multiple organizations provide implementation, support and hosting services, keeping costs low

FOLIO

“future of libraries is open”

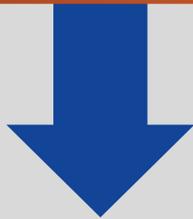

OPEN LIBRARY FOUNDATION

governance, community, funding

FOLIO

platform, product, marketplace

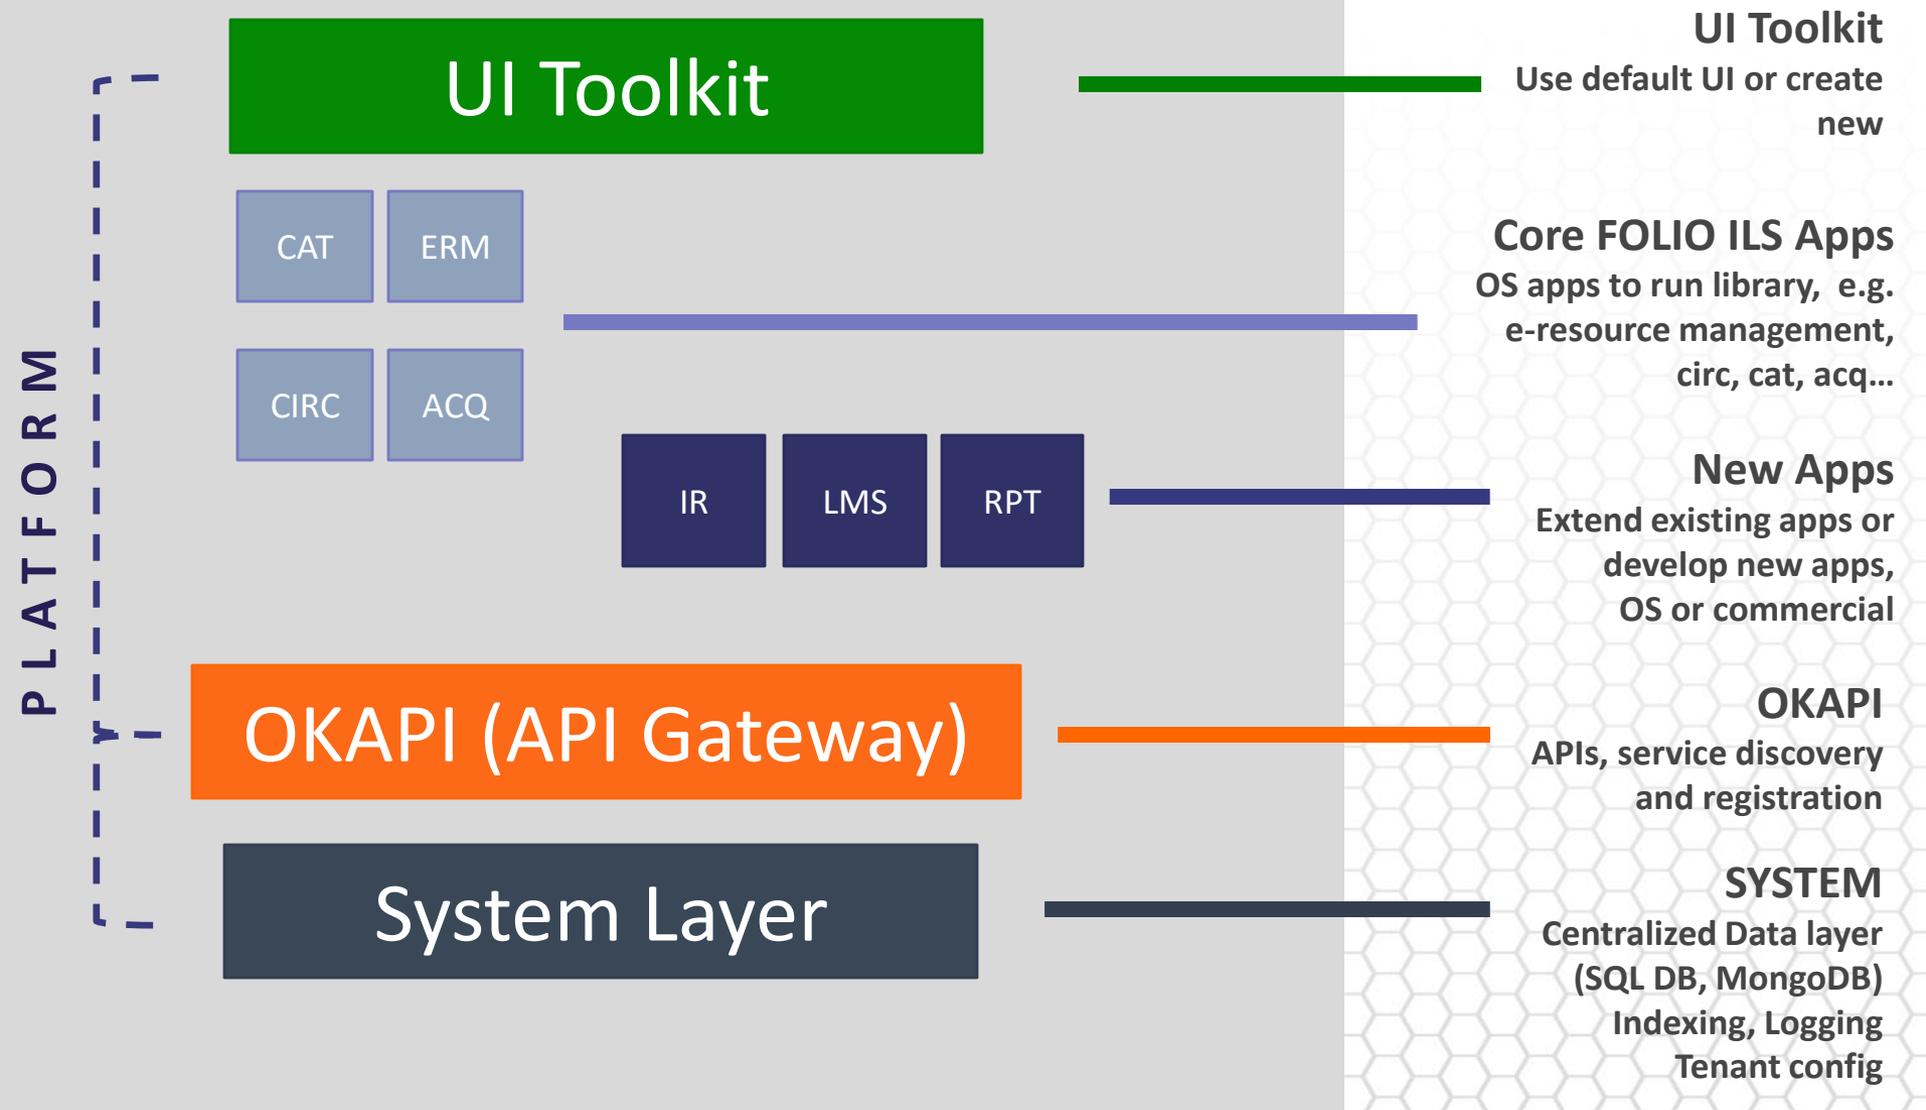

COMMUNITY

design, code sharing, workflows

- FOLIO platform is open source and based on microservice architecture
- FOLIO open platform designed to encourage interoperability and development of new applications
- New apps allow libraries to customize workflows
- Share resources and best practices with the community
- Transform library relationships with their software and suppliers

3. BUILD new solutions

FOLIO ARCHITECTURE

The Value of Partners

Partnership growth: > 60 partners

Access-It Software Ltd	INEK Inc.
Algorhythms (SLIM)	Innovative Interfaces (EDS)
Alist	Insight Informatics - Libero (Australia)
Archimed	IS Oxford Ltd (Heritage)
aStec	IZUM -Institute of Information Science
Aurora Information Technology Pty Ltd	L.A Information Technology Inc. (Smartlib FindPlus)

Baratz / Absys	Max Elektronik SA
Biblimondo (Kuali France)	Mirtech Inc.
Bibliosoft	Monguz
Bookhouse Culture & Science Tech Corp	OCLC (EDS)
BSZ	Online Computer Library Center, Inc. (OCLC)
ByWater (US Koha)	Pergamum
Capita / Prism (old Talis ILS)	Primasoft Informatica Ltda (SophiA)
Civica Pt Limited	Prosentient Systems (Koha)
Concord Australia	PTFS-Europe (Koha)
Cosmotron Bohemia	SIABI
Data Management (SEBINA)	SirsiDynix
EOS (acquired by SirsiDynix)	Softlink International Ltd
eReserve	Soutron Limited
eScire (Koha)	SVOP Ltd.
Futurenuri Inc.	TIND Technologies AS
GBV Gemeinsamer Bibliotheksverbund	TLC The Library Corporation
GLYPH MOBILE	UNIBIS d.o.o
HBZ	WALDO (with PTFS LibLime)
Hyweb	Yordam

SirsiDynix®

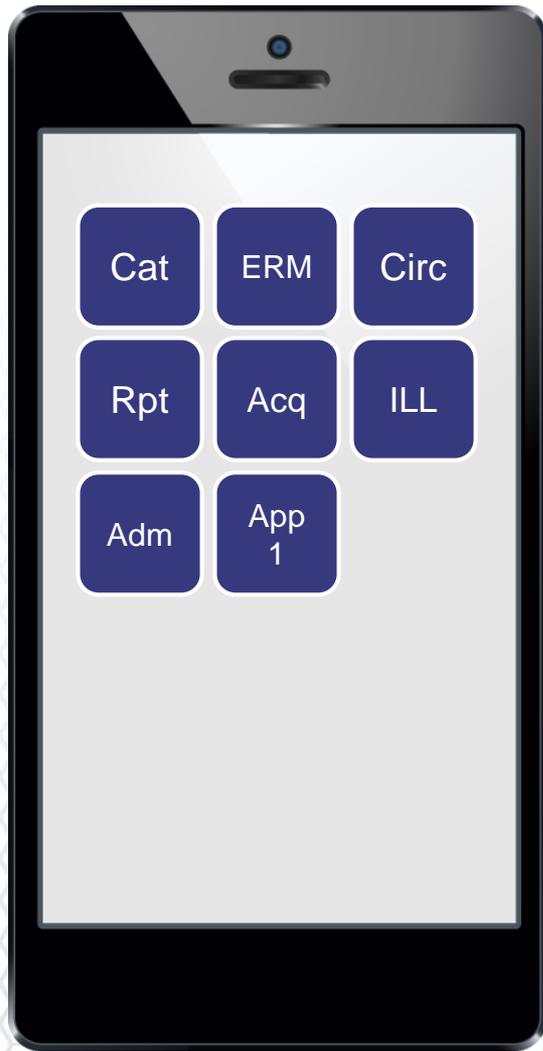

“ SirsiDynix is thrilled about the FOLIO project. We will be providing hosting, service and support for FOLIO at approximately half the cost of Alma.”

Bill Davison, Chief Executive Officer
SirsiDynix

“ ByWater Solutions has a long history of being deeply involved with open source library software. We are 'all in' with FOLIO and looking forward to providing development, hosting and support.”

Nathan A. Curulla,
Co-Owner and Chief Revenue Officer
ByWater Solutions

“Radical Modularity”

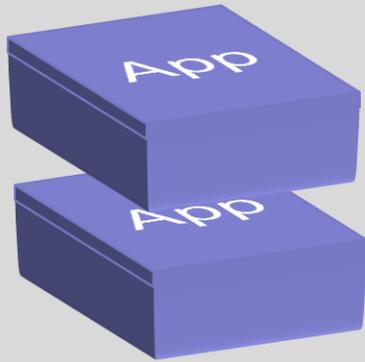

App marketplace

Customized solutions by library

Microservices architecture

Modular Apps

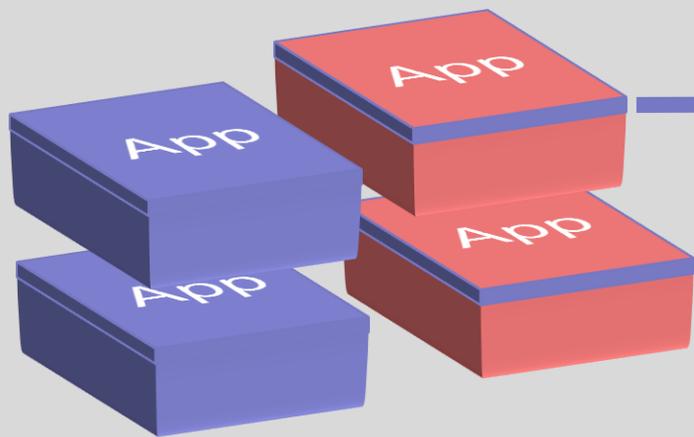

built on an open, extensible platform

- Extensible platform
- System/Tenant
- E-Resource Mgmt
- Acquisitions
- Cataloguing
- Circulation
- Data Conversion Tools
- Knowledge Base
- Resource Sharing

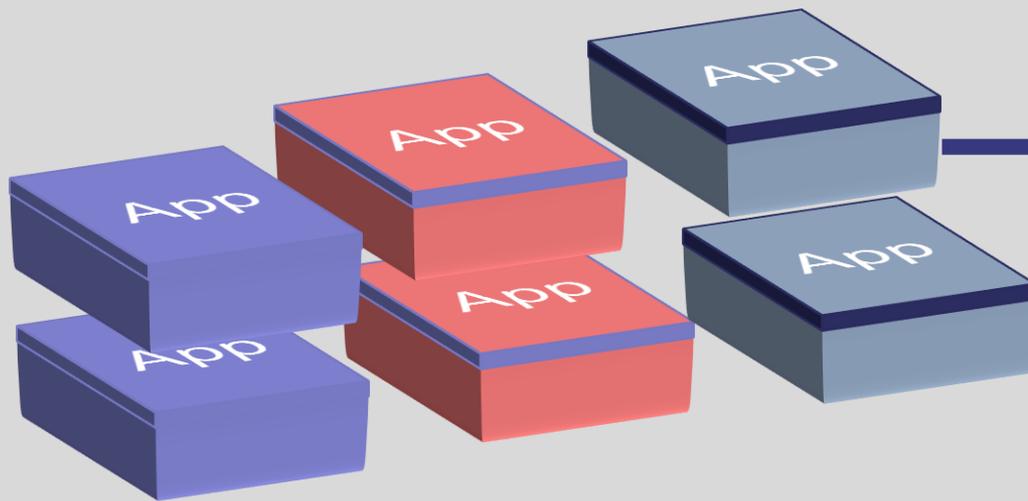

Base FOLIO Solution

open source

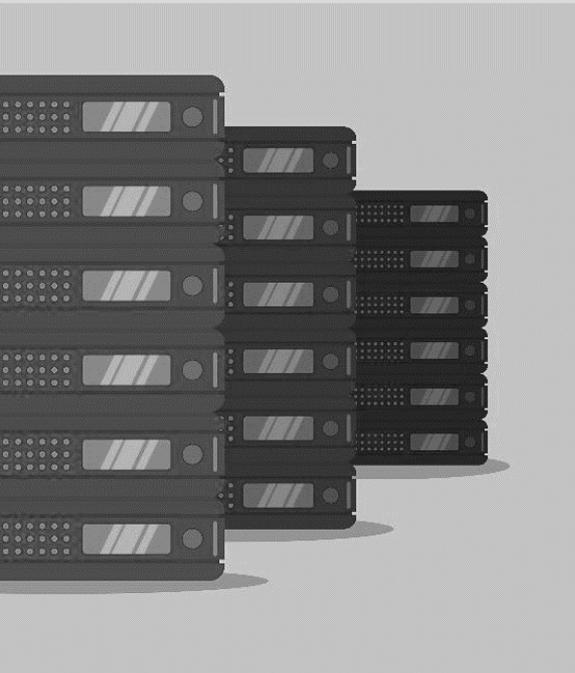

Discovery
Open URL Linking
Holdings Management
Predictive analytics
ILL solutions
eBook integration
Collection Development

Expand the LSP
choose apps from an open marketplace

Linked Data Triplestore
Data Mining
Research Data
Institutional Repositories
Learning Management
ERP integration
Analytics and student
outcomes

Imagine new apps
beyond the ILS/LSP: the FOLIO difference

Project Management
Data Migration
Training
Hosting
Ongoing Support
Consulting
Integration Services
App Development

Service and Support

by EBSCO and others *or host locally*

FOLIO SIMPLICITY

- Supported. Open Source solution
- Turnkey. Out of the box implementation
- Ease of transition from current ILS
- Customize your LSP with certified apps from the marketplace

FOLIO

Community Participation

The screenshot shows the Confluence page for 'FOLIO Communication Spaces'. The page title is 'FOLIO Communication Spaces' and it was created by Peter Murray on Sep 09, 2016. The main content states: 'The FOLIO Project has four primary communication channels and several secondary communication channels. Read about the philosophy of the FOLIO communication channels for more background.' Below this, there is a section titled 'Primary Communication Tools' which includes a 'discuss.folio.org' icon and a 'wiki' icon.

The screenshot shows the 'FOLIO Project' discussion site. It features a welcome message and a list of categories with their respective topic counts and latest posts. The categories are:

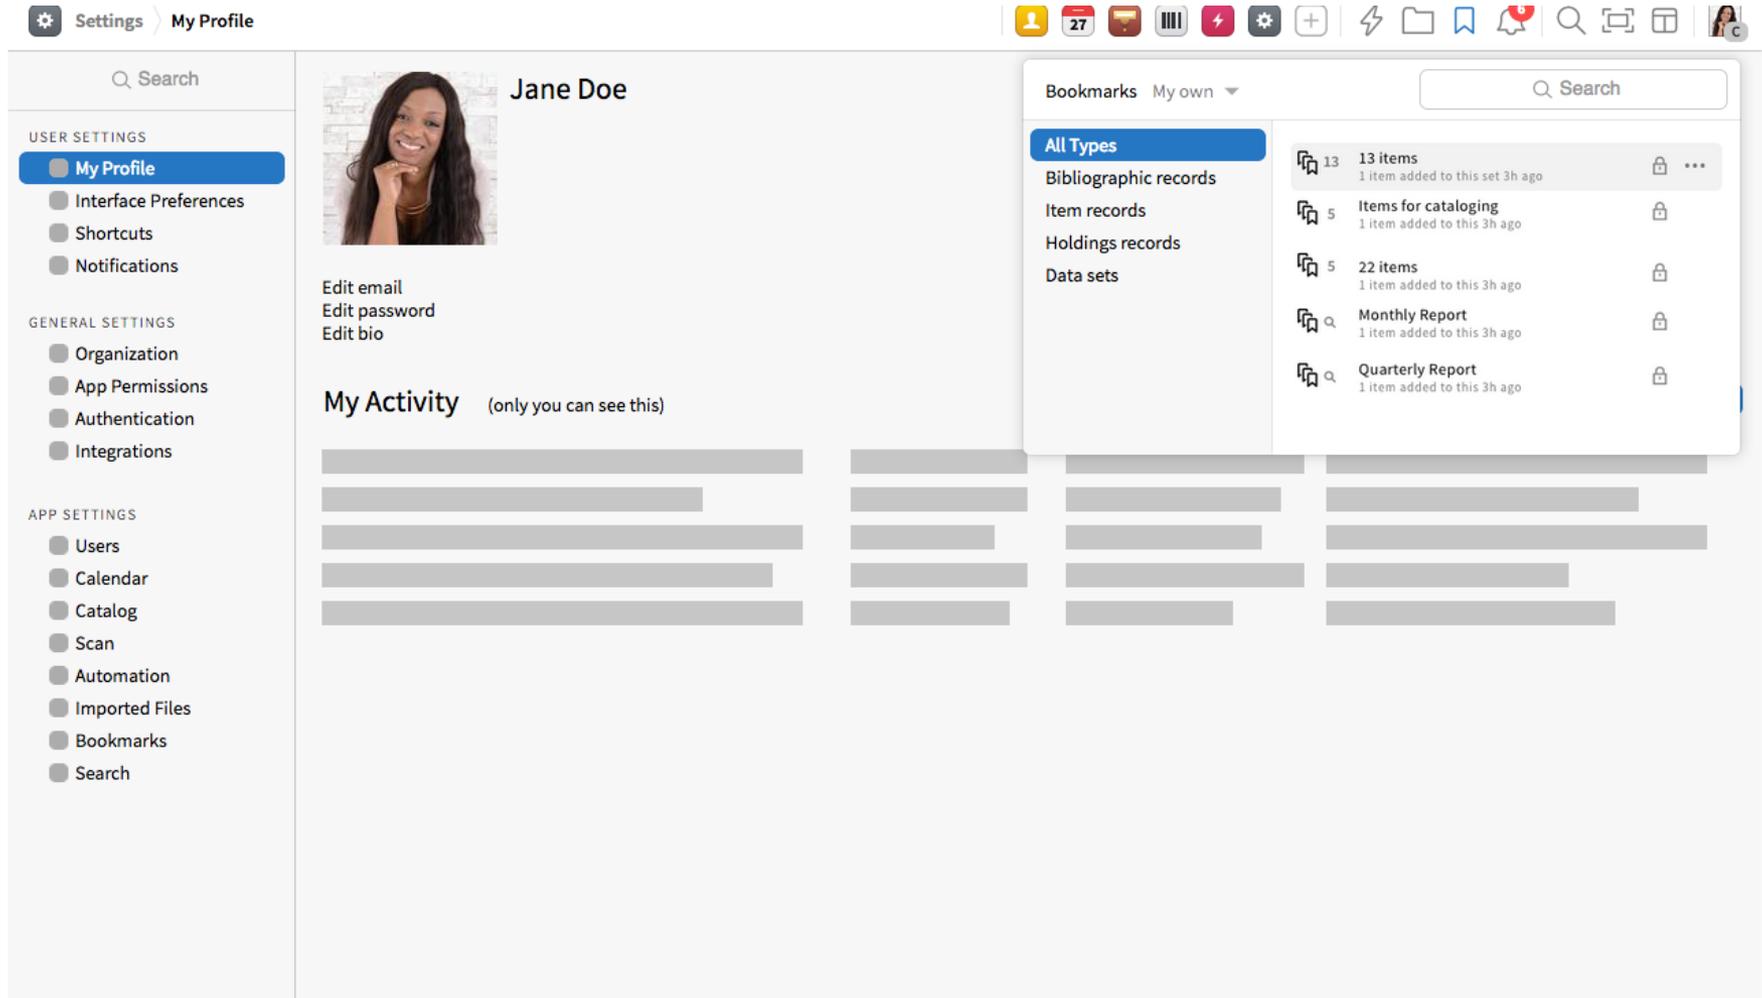

Category	Topics	Latest
Community community@discuss.folio.org - At its heart, FOLIO is about the library community joining in partnership to innovate, develop a new open source library services platform, and transform library technology. This Community category is for learning about the FOLIO work, connecting participants with comm...	2	[Gear icon]
Software software@discuss.folio.org - The FOLIO platform is extensible at its core, supporting traditional resource management functionality, but focused on the ability to deliver new services. This category has topics for discussing the technical aspects of the FOLIO Library Services Platform.	6	[Gear icon]
Special Interest Groups sigs@discuss.folio.org - Core to the FOLIO community is its Special Interest Groups (SIGs). Each SIG has a category under this category for its discussions. ■ Authentication/Authorization ■ kabalog ■ User Interface / User Experience	0	[Gears icon]
Local local@discuss.folio.org - FOLIO is a partnership of library professionals from around the globe, so it is important to offer opportunities for contributors to connect with people in their part of the world. Topics of regional interest can be posted here.	0	[Gear icon]

The screenshot shows the Slack interface for the 'FOLIO' workspace. The 'CHANNELS' list is expanded, showing various channels such as #auth, #development, #general (selected), #kabalog, #linked-data, #opac, #random, #requirements, #resource-management, #support, and #ux. Below the channels, there is a 'DIRECT MESSAGES' section with 144 messages, listing users like slackbot, Andrew Nagy (you), Peter Murray, Sebastian Hammer, and Vince Bareau.

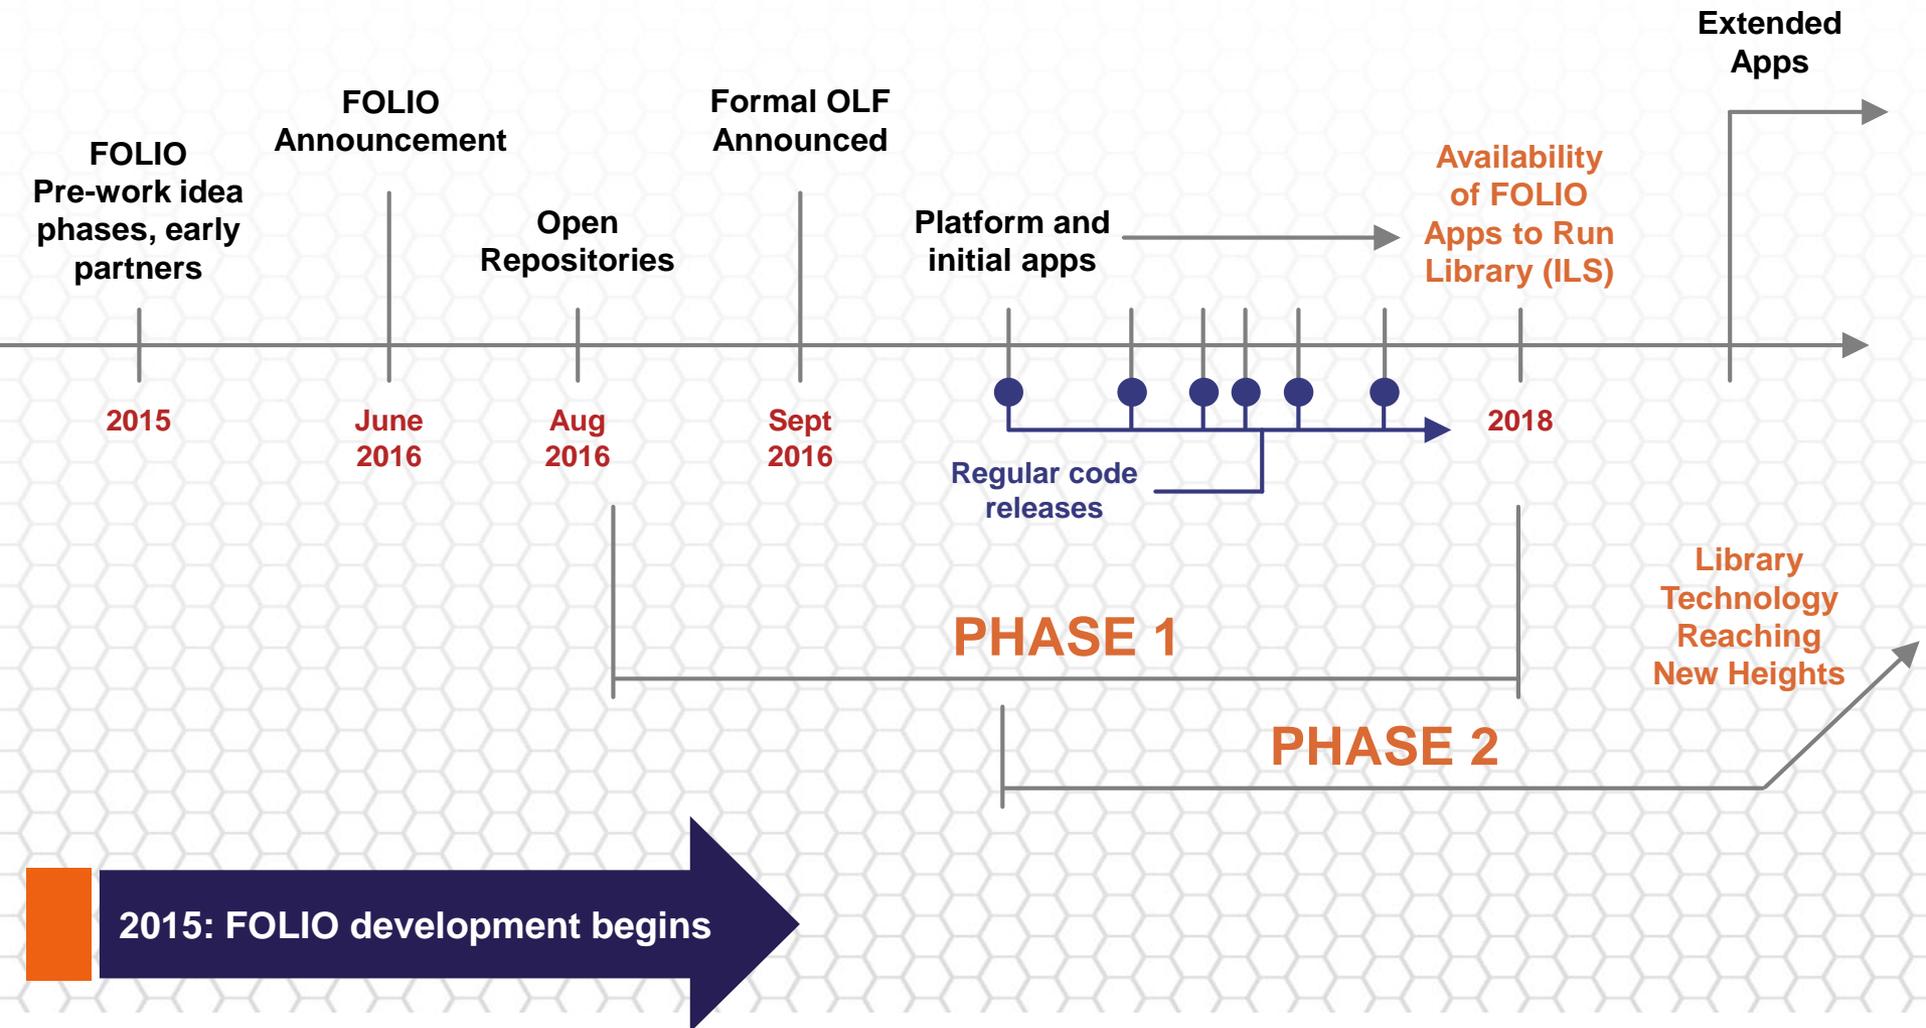

The screenshot shows a message thread in the '#general' Slack channel. The thread is dated September 16th and includes the following messages:

- Mike Taylor** 10:47 AM: To be fair, this is the classic "I support open sources, except when it would be inconvenient to do so" like 😊 I guess you are more ESR than RMS.
- Kurt Nordstrom** 10:49 AM: I don't think that's entirely fair. There are some areas in which there just isn't a good open source tool to use. Especially when it comes to design.
- Mike Taylor** 10:57 AM: Sure. That is why RMS's approach from the start has been that we need to build them 😊
- Kurt Nordstrom** 11:01 AM: That's well and good, unless you have limited resources and deadlines. 😞
- Jack Hill** 11:02 AM: not ideal, but I found <http://pencil.evolus.vn/> hey, I here we have this cool app development framework 😊
- Kurt Nordstrom** 11:03 AM: A more pragmatic focus, IMO, is assuring that your technology choices aren't limiting the application of the project...i.e., incorporating a proprietary component essential to the function of the project.
- Mike Taylor** 11:05 AM: Exactly: more ESR than RMS.
- Jason Skomorowski** 11:05 AM: Requiring a proprietary product as a barrier to contributing to an open source project is quite limiting; fortunately we haven't needed to go quite that far. And it sounds like Filip

FOLIO: UI Prototyping

FOLIO TIMELINE

FOLIO ENGAGEMENT CHANNELS

- Slack channels for real-time chat
- Discuss forum for questions and discussions
- Wiki for documents and Special Interest Groups (SIGs)
- FOLIO.org website for project news and updates
- Developer website with access to documentation and links

FOLIO PARTICIPATION

- 1,500+ librarians have signed up to participate on FOLIO.org
- 250+ librarians have indicated interest in assisting with software development
- 800+ attendees at 4 recent community forums
 - Recent topic; Primer on FOLIO code
- 1,700 Slack messages last week!

HOW YOU CAN PARTICIPATE

FOLIO

The Future of Libraries is Open

FOLIO

“ FOLIO represents a true partnership between libraries and vendors in which we are each making real substantive contributions based on our unique strengths.

For the first time, libraries will be not only customers but investors with vendor partners...”

David Carlson

Dean of Libraries, Texas A&M University
